Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in an email interview with Nicholas Trenkle, Reg No. 54, 500 on August 13, 2010.

The application has been amended as follows:

Claim 11. (Currently Amended) A map display method for detecting the present position of a vehicle and displaying a road map including a vehicle position mark indicating the present position of the vehicle and a guide route along which the vehicle runs, comprising the steps of:

preparing a summarized map indicating the guide route with a summarization degree corresponding to a distance from the present vehicle position to a destination or a running speed of the vehicle;

displaying the summarized map thus prepared on a display screen;
and

giving priorities to roads including each road traversed along the guide route, at least one main road and branch roads in that order in the summarized map;

storing an ID for identifying road data for each of the roads being given priorities, categories indicating road types for the roads, and the priorities set for the roads in a table,

wherein the priorities in said table set for the roads traversed along the guide route and crossing roads intersecting with the guide route in the main road and the branch roads are changed in accordance with a change in the guide route and the crossing roads existing in an area displayed in the summarized map due to a change in the present position and the running speed of the vehicle,

wherein the summarized map is prepared by selecting at least one road on the guide route and at least one road of the crossing roads from the roads based on the changed priorities, and

wherein ~~a number of objects or an occupied area ratio of objects displayed in the display screen is changed~~ each of the number of objects displayed in the display screen and the ratio of the occupied area of the displayed objects to the area of the display screen is changeable in accordance with the running speed of the vehicle by using the changing priorities.

Claim 24. (Currently Amended) A map display method for detecting a present position of a vehicle and displaying a road map including a vehicle position mark indicating the present position of the vehicle and a guide route along which the vehicle runs, comprising the steps of:

preparing a summarized map indicating the guide route with a summarization degree corresponding to a distance from the present position of the vehicle to a destination or a running speed of the vehicle;

displaying the summarized map prepared on a display screen;

giving priorities to roads including roads traversed along the guide route, a main road and a branch road in this order in the summarized map;

storing an ID for identifying road data for each of the roads being given priorities, categories indicating road types for the roads, and the priorities for the roads in a table,

changing the priorities in said table set for the roads traversed along the guide route and crossing roads intersecting with the guide route in the main road and the branch road in accordance with a change in the guide route and the crossing roads existing in an area displayed in the summarized map due to a change in the present position and the running speed of the vehicle; and

preparing the summarized map by selecting at least one road on the guide route and at least one road of the crossing roads from the roads based on the changed priorities,

~~changing a number of objects or an occupied area ratio of objects displayed in the display screen~~ allowing each of the number of objects and the ratio of the occupied area of the displayed objects to the area of the display screen to be changeable in accordance with the running speed of the vehicle by using the changing priorities, and

wherein a number of the selected roads does not exceed a limit number, the limit number being predetermined according to the summarization degree.

Reasons For Allowance

2. Claims 11-20, 22-31 and 34-35 are allowed.
3. The following is an examiner's statement of reasons for allowance: Claims 11-20, 22-31 and 34-35 have been found to be novel and inventive because prior art does not teach all elements of the applicant's invention.

Regarding the independent claims:

The applicant claims including the limitations of: each of the number of objects displayed in the display screen and the ratio of the occupied area of the displayed objects to the area of the display screen is changeable in accordance with the running speed of the vehicle by using the changing priorities. This limitation in combination with the rest of the limitations of the claims is novel.

4. Any comments considered necessary by the applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
